ESF helps to the employment development by supporting of employment, entrepreneurial spirit, equal opportunities and by investments to the human resources

OBJECTIVES AND PROFESSIONAL ORIENTATION OF THE CONFERENCE

The main objective of the conference is to create for the conferees the international space for obtaining the newest knowledges and experiences from the field of usage the modern informational and communicational technologies in the education. The conference is determined namely for the pedagogical-scientific university employees performing the education in the field of ICT but also for pedagogics working in the primary, high and specialized schools. Even the conferees from master and doctor level students are welcomed.

The sense of the conference is to support the active cooperation of affiliated workplaces in ČR and even foreign countries and to establish the contacts between pedagogic employees on various levels of education. The conference provides space for a discussion about actual problems, their analysis and further steps and resolvement way definition. Thanks to financial support from the European Social Fund and from the state budget of the Czech Republic there are created unrivalled conditions not only for attendance of pedagogical and scientific employees but namely also of the doctor level students.

There will be issued a lectured memorial volume with ISBN from the conference containing synopsis of invited lecturer's lectures and contributions of the conference conferees. Even the conferees, who do not have a possibility to participate in the conference personally, will have an opportunity to publish their contributions in the memorial volume. The memorial volume will be freely available for downloading on the conference web page (<http://infotech.upol.cz>) for registered conferees after the conference termination. They will be further available in the printed form via the most important libraries in the Czech Republic.

The conference is focused on the following thematic spheres:

- actual trends in the usage of ICT in the education,
- the usage of ICT during education of particular subjects on primary and high schools (mathematics, biology, chemistry, physics, history, Czech language, foreign languages, art teaching, technical teaching, music teaching, informatics, electrical engineering, economy, mechanical engineering...),
- the usage of ICT in university level of education (technical, natural, economical, socio-scientific, medical etc. fields),
- information-administrative systems for primary, high schools and universities,
- e-Learning and distant support creation,
- the benefits of the program e-Twinning,
- project teaching with the usage of ICT,
- Internet and multimedia,
- the usage of ICT during spare time,
- development of information literacy in the 21th century,
- Linux and open source software in the education,
- ICT in the company education,
- information systems in the libraries,
- new publication and textbook of the ICT field review.
